

General Job Description for Members of the Teaching and Research Staff

1. The job responsibilities of the members of the teaching and research staff include teaching, research, development or other creative activity, and administrative work. The duties of these areas of work are more generally described in this Annex to the rules. Annexes 2-10 establish which generally described work duties are required in a specific position of teaching or for a member of the research staff, in the areas related to teaching, research and development or other creative activity and administrative work.

2. The job responsibilities related to teaching are:

2.1. Teaching, including:

2.1.1. Planning the teaching process – preparations for carrying out teaching, selecting teaching aids, study environments and teaching methods, etc.;

2.1.2. Carrying out teaching – organisation and supervision of contact learning in the form of auditory work and e-learning, professional placement and independent work, directing interdisciplinary projects of students, etc.;

2.1.3. Assessment and provision of feedback – assessment of learning outcomes of the course, providing feedback to student papers, participating in the work of the defence committee of final theses and doctoral theses, participating in the work of the final exam committee, participating in the work of the appeal committee, reviewing student papers and acting as an opponent in doctoral theses, participating in RPL calculation, etc.;

2.2. Supervision – supervising final theses, including doctoral theses;

2.3. Study development– study programme administration, participating in the compilation and development of a study programme, compilation and development of courses, course programmes and course descriptions, creation and development of teaching aids, learning environments, reference and methodology materials, etc.;

2.4. Support activity for teaching – participating in student admissions, participating in planning and organising study activity, teaching-related reporting, introducing learning opportunities in Tallinn University, self-development for achieving necessary knowledge and skills for teaching, etc.

3. Teaching may involve all university students and take place in degree study as well as continuing education, which may include all forms and levels of degree study. Teaching may take place in different structural units of the university and also within the framework of cross-university cooperation. Teaching is conducted pursuant to the procedures established in the university.

4. The calculation of teaching load takes place as follows:

4.1. the volume of teaching is mainly assessed on the basis of the volume of credit points of teaching carried out and the number of supervised and defended student papers and final theses;

4.2. in teaching, one ECTS credit is equivalent to 18 astronomical hours of work, which includes auditory teaching or real-time E-teaching in the extent of seven hours and in the remaining part planning and assessing the study process and giving feedback. This calculation is valid in the case of approximately 20 students;

4.3. in supervision, the volume of a final thesis at the first level of higher education is considered as being equal to 30-40 astronomical hours and the volume of final thesis at the second level of higher education is considered as being equal to 50-60 astronomical hours. The volume of supervising a doctoral thesis is considered to be 50-60 astronomical hours per calendar year. In the supervision of professional placement, calculation based on credit points referred to in clause 4.2 may be replaced with the following calculation: one

credit point (ECTS credit) equals the work of 0.5-1 (in case of pedagogical practice, 0.5-1.5) hours per student; [Amended 25.04.2016; amended 13.03.2017]

4.3¹. further conditions for the calculation of the volume of teaching may be established by the Rector; [Entry into force 26.04.2016]

4.4. in addition to the above, Head of unit may establish differences in the calculation of the volume of teaching if it is necessary due to specifications arising from the speciality, in case of a new course or a different number of students, in applying different forms of e-learning and in other justified circumstances. Conditions will be applicable similarly to all employees working under similar conditions. The immediate superior of an employee shall agree with the employee on the volume of teaching in a calendar year; [Amended 25.04.2016]

4.5. the immediate superior shall agree with the employee on the volume of teaching tasks in a calendar year, according to the volume of all work tasks of the employee. Agreement on the volume of teaching and supervision duties is based on the volume of corresponding duties described in Annexes 2-10; [Amended 25.04.2016]

4.6. the estimated volume of teaching among all work duties in a specific employment position for a member of teaching or research staff is given in Annexes 2-10.

5. Teaching performance is mainly evaluated on the basis of feedback given by students and efficiently supervised student papers and final theses, but also on the basis of completion of other work duties related to teaching performed in the position. It is also presumed that study programme development takes place in the study area, and modern teaching aids and methodology will be used and further developed.

6. The members of the teaching staff who carry out professional education of teacher of pre-school childcare education, class teacher, teacher of one or several subjects in basic school or upper secondary school or teacher of vocational educational institute, shall within a period of every three (3) years deliver at least 100 lessons corresponding to the speciality or subject he or she teaches in the educational establishment of the corresponding level of education.

7. The job responsibilities related to research, development or other creative activity are:

7.1. Research and development, including

7.1.1. Planning basic and applied research – applying for financing or participating in the application, initiating a research topic or research project, etc.;

7.1.2. Carrying out basic and applied research – planning research, collecting and analysing data, working with literature, conducting experiments, fieldwork, Heading research projects, including managing the people, processes and budget, reporting, etc.;

7.1.3. Publishing and assessing research results – compiling and publishing research publications, editing research magazines and collections, reviewing research publications, participating in conferences and organising these, etc.;

7.1.4. Developing and applying the knowledge received through research and experience into producing new materials, products and devices, implementing processes, systems and services or improving these significantly, etc.;

7.2. Creative activity – participating in a creative contest, presenting creations, organising creative events, participating in a specialised master's course, reflecting creation in media, etc.;

7.2¹. The Rector may establish criteria following the specific characteristics of the field for replacing the requirements for the compilation and publication of research publications with outstanding recognized results achieved in professional development and creative activity. A proposal regarding the establishment of such criteria may be submitted to the Rector by the council of the unit. [Entry into force 26.01.2016]

7.3. Activity supporting research and development or other creative activity – developing tools, reporting on research, development and creative activity, participating in the work of research and creative organisations

and expert panels, popularising the speciality, introducing the research, development and creative activity results to the public, self-development for developing the knowledge and skills necessary for research, development and creative activity, etc.

8. In the fields of art, creative activity may be added to research and development or may replace these.

9. The volume of research, development or other creative activity is calculated as follows:

9.1. The volume is mainly evaluated on the basis of the existence of research publications, research projects and development projects with research component that are funded outside of the university or in the field of arts, the existence of creative work presentations and creative projects.

9.2. The member of the teaching or research staff shall perform the duties of compiling and publishing research publications or presenting creative work depending on the employment position in the volume described in Annexes 2-10. The volume of other research, development or creative activity duties is not determined separately. The immediate superior shall agree with the employee on the volume of these activities in a calendar year, according to the volume of all work duties of the employee.

9.3. The estimated volume of research and development or creative activity among all the work duties on a specific employment position of a member of teaching or research staff is given in Annexes 2-10.

10. The performance in the field of research, development or other creative activity is assessed mainly on the basis of the level of research publications, research projects and development projects with research components that are funded from outside of the university or in the field of arts, on the level of creative work and creative projects. It is also based on the performance of the other work duties of research, development and creative activity performed on the employment position. Among other things, it is presumed that presentations will be made in (international) research or creative events and cooperation takes place with other universities, research establishments and companies.

11. Teaching, research and development or other creative activity is accompanied by self-development for improving the knowledge and skills necessary for the activity. Self-development may include work with literature, receiving counselling from a mentor, continuing education related to teaching skills or participation in other training and activities, including those that take place outside of the university. Professional development of members of the teaching staff may take place within the framework of sabbatical leave.

12. The tasks related to administrative work are:

12.1. Participating in the work of the academic and administrative bodies of the university;

12.2. Participating in the work of academic bodies and bodies related to academic work outside of the university;

12.3. Performing a management duty – managing an academic sub-unit or a unit related to work-organisation, including managing people, activities and a budget;

12.4. Introducing the university and one's own speciality to the public through public performances, opinion pieces, etc.

13. The estimated volume of administrative work among all work duties in a specific employment position of a member of the teaching or research staff is given in Annexes 2-10.

14. The volumes of work duties established in Annexes 2-10 and the division of working time between different work duties are only valid for full-time work.

15. The employee and his or her immediate superior shall agree on the specific work duties, their volume and expected results for a calendar year and/or longer period at the beginning of the employment relation and subsequently on an annual basis during the evaluation and development discussion.

16. The immediate superior of an employee is the Head of a university unit or subunit, except when otherwise established by the work organisation in the unit.
